

# TYPES 1N1816 THROUGH 1N1836 DIFFUSED SILICON POWER REGULATORS

**10 WATTS • 13 to 91 VOLTS**

### Guaranteed Zener Impedance

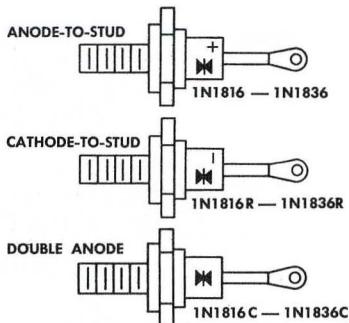

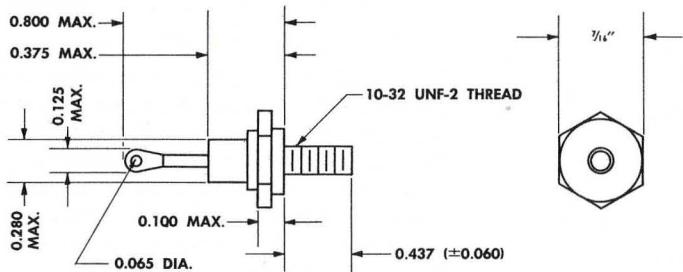

Available in

- 5% and 10% tolerances
- conventional and reverse polarity
- double anode clipper

**Designed to meet the most stringent military requirements.**  
**-65 to +150°C operation**

### mechanical data

Welded case with glass-to-metal hermetic seal between case and anode lead. Approximate weight is 4.36 grams.

### electrical specifications

type	zener voltage $V_z$ @ $I_z$ volts	zener current $I_z$ mA	zener impedance $Z_z$ (max) @ $I_z$ ohms	reverse current $I_{zB}$ 25°C μA		typical temperature coefficient %/°C
				@ -5V	@ -10V

# TYPES 1N1816 THROUGH 1N1836

## TYPICAL CHARACTERISTICS

### MAXIMUM ALLOWABLE DISSIPATION

### MAXIMUM SURGE CURRENT VS. TIME

### ANODE-TO-STUD or CATHODE-TO-STUD CONFIGURATIONS

Types 1N1816 – 1N1836 exhibit polarity such that the regulated voltage taken off the solder lug is *positive* with respect to the threaded stud. For reverse polarity, specify 1N1816R – 1N1836R. The "R" series devices exhibit polarity such that the regulated voltage taken off the solder lug is *negative* with respect to the threaded stud.

Types 1N1816A – 1N1836A series have a tolerance of  $\pm 5\%$ . 1N1816 – 1N1836 have a tolerance of  $\pm 10\%$ . For cathode-to-stud configuration with  $\pm 5\%$  tolerance, specify 1N1816RA – 1N1836RA.

### 1N1816C — 1N1836C CLIPPER

Types 1N1816C – 1N1836C are specifically designed to clip, and exhibit true double anode characteristics. Each zener is held within 10% tolerance of the specified voltage. See "Typical Clipper Characteristics" curve at left.

### DESIGN NOTES

Types 1N1816 – 1N1836 stud mounted power regulators are designed to meet or exceed the environmental requirements of MIL-T-19500A as follows:

Test	Paragraph
Solderability . . . . .	4.6.23
Temperature Cycling . . . . .	4.6.24
Moisture Resistance . . . . .	4.6.26
Drop . . . . .	4.6.27
Shock . . . . .	4.6.28

Test	Paragraph
Centrifuge . . . . .	4.6.29
Vibration Fatigue . . . . .	4.6.30
Vibration Noise . . . . .	4.6.31
Reduced Pressure . . . . .	4.6.32
Salt Spray . . . . .	4.6.35
